## **Senior Landscape Architect Job Description**

***Salary: DOE***

***Location: London***

***Permanent job position***

You will be working for a well-established landscape architecture and design practice that specialises in creating bespoke gardens and outdoor spaces for both private residences and commercial developments worldwide. You will use your expertise to design and manage a range of projects, which could be anything from a small terrace to the gardens of a grand stately home.

### **Landscape Architect Responsibilities**

This landscape architect job vacancy is the ideal opportunity to use all your design and project management skills to oversee all aspects of various landscaping projects from the concept through to completion.

In this landscape design job you will be expected to:

- Provide creative and original ideas for plant design and landscape features
- Develop mood boards and concept drawings
- Produce detailed construction plans and specifications for designs and builds
- Create schedules for the work to be carried out
- Source materials
- Monitor quality and costs of the project
- Manage and support junior members of the design team
- Attend and/or lead client meetings

### **Requirements for this Senior Landscape Architect Job**

- A minimum of 5 years post qualification experience in a landscape architecture or design role.
- Experience in both commercial landscape and high-end residential garden design.
- A good understanding of horticulture, with knowledge of different plants and planting requirements.
- A good knowledge of hard landscaping and construction elements.
- Proven management skills of both people and projects.
- Excellent communication skills.
- Ability to build relationships with clients.
- Excellent graphic skills and competency in AutoCAD, Sketch Up, Photoshop and Adobe Creative Suite as well as Microsoft office programmes.
- Ability to use other 3D rendering software is beneficial.
